

# THE QUAD SURVEY

The Quad is scheduled to open later this year. The Youth & Family Committee and Management have been working on a draft programming for the B1 level (6 to 14 years). We have prioritized programming that is less commonly available at home and offers a wide variety of choices to the kids.

The draft programming is presented in three segments in this survey with proposed unit and space allocation. This proposed combination of programming can be accommodated in the allocated space.

We are open to new ideas or change in allocation and are seeking your inputs via this survey. Please note that any change could entail a trade-off in other areas of programming.

*Note: A mini theatrette and an in-house climbing structure called the Wallholla have also been provisioned for this area and these are built-in.*

**Tick as many options as you wish.**  
**All card carrying Members (parents and Junior Members) may participate.**  
*The results of the survey will guide the final selection and allocation of programming based on space and budget. Results will be announced in an upcoming Watson Kids email update. Participants will be invited for the programming simulation before the launch of The Quad!*

## SECTION A: EDUCATIONAL PLAY

- o **Marble Machine by The Tinkering Studio (Wall mounted)**

*The Marble Machine located at the Spore Science Centre allows a child to direct a path of marbles through peg, tracks and bells building endless during plays. We are collaborating with the Science Centre on the build and facilitation of the Marble machine.*

- o **Lego wall and Lego tables (2 tables)**

*This is a classic space for kids of all ages to enjoy. We are working with Lego education to offer add-ons including Lego robotic classes.*

- o **Imagination Playground (Blocks)**

*Large modular blocks for children to expand their creativity*

## SECTION B: TECHNOLOGY

- o **Gaming (4 units)**

*Prior to the migration to the temporary spaces, the Zone comprised of 36 gaming units including PCs, Wii, Xboxes, Playstation and Arcade games. The team received constant feedback across the years from parents to reduce the numbers as gaming is now readily available on most electronic devices as well as home computers . The footprint of gaming units available was downsized to by 62% to 14 units at its current site and will reduce to 13 units at the new space.*

- o **Arcade Machines (3 to 4 units)**

- o **Basketball**
- o **Mariokart**
- o **Pac Man**
- o **Transformers**

- o **Nintendo Switch (2 Units)**

*Suggested games: The Legend of Zelda, Minecraft, Splatoon 2, FIFA 18*

- o **Playstation 4 (2 Units)**

*Suggested games: Rayman Legends, Little Big Planet 3, Hasbro Family Fun Pack, Just Dance and Sing Star.*

## SECTION C: EVERGREEN

The games listed in this section are currently available at The Zone and have remained popular over the years. Let us know if you'd like them to be available at The Quad!

- o **Football**
- o **Air Hockey**
- o **Table Tennis/Ping Pong**
- o **Assorted Board Games**

*(We have allocated space in the new Quad for some of these games - please let us know your favorite Board game in the comments section below so we will try out best to include it.)*
